As a member of one of the country’s top-tier research universities, the College of Engineering & Computing (CEC) is actively engaged in cutting-edge studies and education and is home to top-level research laboratories and facilities. CEC has two schools — Moss School of Construction, Infrastructure and Sustainability; and the School of Computing and Information Sciences — and four departments — Biomedical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Materials Engineering.

By the Numbers

- **TOP 100**
  - Total Engineering R&D Expenditures among 640 schools

- **$25 million**
  - in annual research expenditures

- **#5**
  - Computer Science (inside Eng.) Degrees awarded by school

- **30%**
  - of our faculty are fellows in their societies

- **#3**
  - Highest percentage of doctoral degrees to foreign nationals

- **29%**
  - Female master’s students enrolled

- **71%**
  - Job Placement: Spring 2018 graduates are employed

- **21**
  - Professional degrees and certificate programs offered

FIU’s School of Computing and Information Sciences (SCIS) is a premier institution for education, training, research and technology development in Florida. It is the second largest engineering college-based computer science degree-awarding program in the U.S. As a part of the College of Engineering & Computing, students enjoy experiential learning opportunities and close interaction with WorldsAhead faculty. Through internship opportunities in the industry and hands-on research activities in cutting-edge laboratories, graduates are prepared to hit the ground running in their chosen careers.

**RESEARCH**

SCIS faculty pursue a diverse collection of research and technology transfer opportunities designed to advance computer science and information technology. SCIS researchers take a multi-disciplinary approach to solving both theoretical and applied computing problems. The school’s approach has also grown from traditional computer science themes such as algorithmic analysis and computer language development to one which embraces the integration of computing in fields like computational sciences, bioinformatics, disaster management, GIS as well as cutting-edge technology topics like cloud computing, social networks, cybersecurity, and highly reliable systems.

**FOUNDATIONS**

Our world-renowned faculty members are recognized leaders in research and education. S. S. Iyengar, school director, is a member of the European Academy of Sciences and a fellow of ACM, IEEE, AAAS, AIIME and NAI. Mark Weiss is a recipient of the IEEE Computer Society Taylor L. Booth Education Award. Weiss is principal investigator of a new $5 million FIU-led National Science Foundation S-STEM grant award, with partners at University of Central Florida (UCF) and University of South Florida (USF), that provides hundreds of scholarships to students studying computing over the next five years. Shu-Ching Chen is a fellow of the AAAS, IEEE and SIRI and editor-in-chief of IEEE Multimedia magazine. He is a co-principal investigator of a $5 million NSF Center for Research Excellence in Science and Technology where he focuses on big data analysis of environmental impacts.

**PARTNERSHIPS**

SCIS partners with institutions and companies worldwide to pursue joint R&D projects, publish scientific findings, and provide student training. We collaborate with prestigious facilities such as IBM Thomas J. Watson Research Center, Lawrence Livermore National Laboratory, Sandia National Laboratories and Oak Ridge National Lab. The school engages leading educational institutions such as: Cornell University, Purdue University, Indian Institute of Science, Tsinghua University, Chinese Academy of Sciences, Federal University of Sao Carlos (UFSCar), University of Campinas (UNICAMP) and Politechnic University of Warsaw, Poland. The school partners with Facebook, Farelogix, Google, Intel, Microsoft, Verizon, and Ultimate Software to strengthen the pipeline of talent pursuing CS/IT degrees.

**GRADUATE DEGREES OFFERED**

- M.S. Data Science
- M.S. Cybersecurity
- M.S. Computer Science
- M.S. Informative Technology
- M.S. Telecommunications and Networking
- Ph.D. in Computer Science

**COMBINED BACHELOR’S AND MASTER’S DEGREE (4+1) PROGRAM**

The combined B.S. & M.S. Degree Program is an accelerated program designed for outstanding undergraduate students currently enrolled in the college who wish to pursue their M.S. degree while remaining in the college for their B.S. degree.

**RESEARCH HIGHLIGHTS**

- Big data/cloud computing
- Software engineering
- Bioinformatics and computational biology
- Computer science education research

**GRADUATE RESEARCH OPPORTUNITIES**

- Intelligent systems, including artificial intelligence, machine learning, neural networks, affective computing, intelligent user interfaces, health informatics and formal methods
- Cybersecurity, trustworthy computing, sensor and computer networks, including network protocols, multimedia networking, robotics and wireless communications

**FACILITIES**

Integrated Computer Augmented Virtual Environment (i-CAVE): An open laboratory dedicated to creating virtual reality experiences for research, creative projects, learning exploration and data visualization
FIU Discovery Lab: Designed to mentor and assist student teams engaged in creating innovative solutions to challenging societal problems

---

**POINTS OF PRIDE**

3 IEEE Distinguished Educators/Scientists* 4 ACM Career Awards* 5 NSF Career Awards*

---
